

## ADISTEC QUEST SECONDARY STORAGE PLATFORM

Adistec Quest QoreStor is a software-defined secondary storage platform based on Quest's proven DR Appliance's resilient deduplication and replication technologies. With QoreStor, you can accelerate backup performance, reduce storage requirements and costs, and replicate safer and faster to the cloud for data archiving, disaster recovery and business continuity.

### OUR VALUE:

1. Three models that fit any customer's need
2. Fully integrated with Adistec Enterprise Cloud
3. Remote Administration services that minimize complexity
4. Post sale support by Adistec Total Support
5. Initial Configuration by Adistec Professional Services
6. Intuitive and centralized management tools

### Enterprise Cloud Services

Adistec Enterprise Cloud services are included! You can replicate data to our Data Center.

### Initial Configuration Services

Adistec Professional Services will provide QoreStor Configuration and Installation.

## ADISTEC QUEST SECONDARY STORAGE PLATFORM

| QoreStor Initial Setup          | Up to 4 hours included, remote service                                   |                                   |                                  |

### SECURITY

Operating System: closed, protected & optimized  
Call-to-Home service for faster response  
RAID 5/6 for Data

### SCALABLE

Multiple connectivity options (iGBPs, 10G & HBAs)  
Enterprise capacity disk drives (SAS at 12GBps)

### PERFORMANCE

Latest generation Intel Xeon processor  
Pre-configured for optimum performance

### FLEXIBLE

Remote administration interface  
Scalable storage capacity  
Redundancy of critical physical components

### CLOUD INTEGRATION

Fully integrated with Adistec Enterprise Cloud:  
Cloud Backup (BaaS) and Replication (DRaaS)
