

ADISTEC QUEST SECONDARY STORAGE PLATFORM

Adistec Quest QoreStor is a software-defined secondary storage platform based on Quest's proven DR Appliance's resilient deduplication and replication technologies. With QoreStor, you can accelerate backup performance, reduce storage requirements and costs, and replicate safer and faster to the cloud for data archiving, disaster recovery and business continuity.

OUR VALUE:

1. Three models that fit any customer's need
2. Fully integrated with Adistec Enterprise Cloud
3. Remote Administration services that minimize complexity
4. Post sale support by Adistec Total Support
5. Initial Configuration by Adistec Professional Services
6. Intuitive and centralized management tools

Enterprise Cloud Services

Adistec Enterprise Cloud services are included! You can replicate data to our Data Center.

Official Training

Adistec Education, the Authorized Training Center for QUEST, will give you or your customer, one seat to attend a QoreStor training, all materials included.

Initial Configuration Services

Adistec Professional Services will provide QoreStor Configuration and Installation.
