

## ADISTEC PROFESSIONAL SERVICES

# Bind ID Integration Rapid Deploy

### DESCRIPTION

Our BindID Integration Rapid Deploy service consists of a package of up to 40 hours of consulting under the modality of "Time and Materials" that allows customers who already have this solution implemented to expand its functionality and extend its use in other additional applications taking advantage of licensing. In this way Adistec provides a service limited in hours, taking advantage of the Know-how acquired to expand the use to new applications in a short period of time and maximizing the ROI.

## LIMITATIONS AND OUT OF REACH

The integration of connecting bus outside those indicated in this document is beyond the scope. Only one connection bus per application is considered. Activities for communication assistance and adoption workshops consist of working sessions where references, recommendations and best practices are provided; Adistec does not generate manuals, graphic arts or any other content. BindID is assumed to be operational and functional. Adistec does not guarantee or guarantee the compatibility or viability of the integration of the applications. Under the modality of "Time and Materials" the client has the right to the consumption of hours contracted in this package by Adistec to make all commercially reasonable efforts in the integration activities, but accepts and understands that such integration is not assured.
