

# KACE® Cloud Mobile Device Manager

Easily identify and manage the mobile devices on your network.

In today's mobile organizations, employees expect to be allowed to use the mobile devices they choose to access corporate resources, so they can be productive anywhere, any time.

You'd love to oblige, but you need to minimize security risks. You need to know exactly what mobile devices — both company-provided and BYOD — are accessing your network, and be able to manage and secure them.

Moreover, since you're already managing multiple solutions across the IT infrastructure, you need a solution that's fast and easy to deploy and use, and that won't require lots of space in your data center or hours of your precious time to keep running.

KACE® Cloud Mobile Device Manager (MDM) makes it easy to inventory and

manage the mobile devices accessing your network. And because the KACE Cloud MDM is a SaaS solution, getting started is quick and simple — and you'll incur no management overhead and sacrifice no space in your data center.

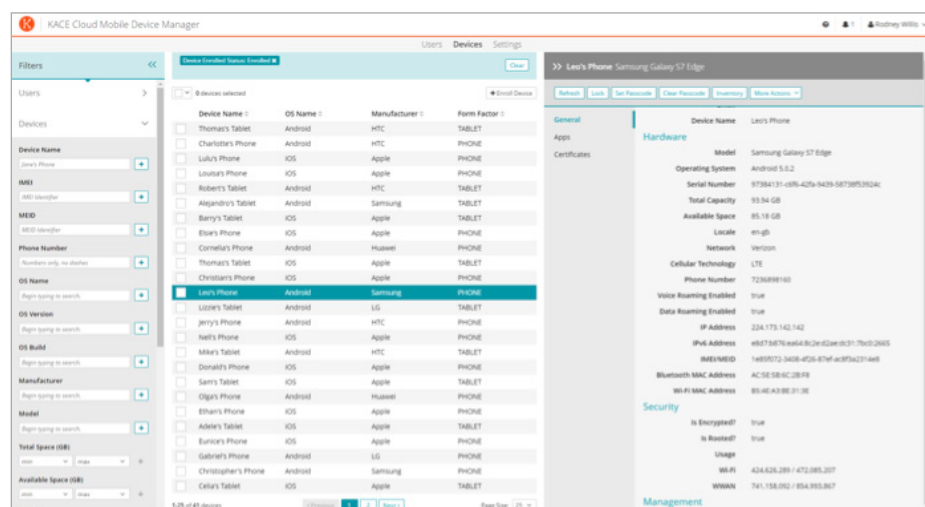

KACE Cloud MDM provides easy device enrollment, comprehensive inventory information, and a broad set of commands — from resetting a password to wiping a stolen device — that help minimize security risks and data breaches.

And if you use KACE Cloud MDM together with the KACE Systems Management Appliance (SMA), you'll be able to inventory, manage, secure and service the devices, both traditional and mobile, on your network through a single pane of glass — with no additional cost for the integration.

KACE Cloud Mobile Device Manager makes it easy to inventory and manage your employees' mobile devices. And because it's a SaaS solution, you'll be up and running in no time.

## BENEFITS:

- Enhance security by identifying, inventorying and controlling the mobile devices accessing your network
- Minimize management effort with an easy-to-use interface that offers powerful, consistent functionality across mobile device platforms
- Minimize risk by easily locating or wiping any lost or stolen mobile device
- Inventory, manage, secure and service the devices, both traditional and mobile, on your network through a single pane of glass by integrating KACE Cloud MDM with the KACE SMA at no additional cost
- Implement in hours, avoid capital costs and management overhead, and receive enhancements and upgrades as soon as they are available with a SaaS delivery model

KACE Cloud MDM provides a comprehensive inventory of the mobile devices on your network and makes it easy to granularly manage and secure any device.

Use KACE Cloud Mobile Device Manager together with KACE Systems Management Appliances and you'll be able to inventory, manage, secure and service both mobile and traditional devices on your network through a single pane of glass — and there's no additional cost for the integration.

## SYSTEM REQUIREMENTS

### SUPPORTED MOBILE PLATFORMS

Apple iOS version 8 or higher

Android version 5 or higher

### SUPPORTED BROWSERS (FOR ACCESSING THE ADMIN PORTAL)

Google Chrome version 49 or higher

Microsoft Internet Explorer version 11 or higher

Microsoft Edge version 12 or higher

Mozilla Firefox version 45 or higher

Apple Safari version 7 or higher

## FEATURES

### Easy device enrollment

Simply provide your users with a URL that enables them to register their devices with KACE Cloud MDM. Upon enrollment, the device will be provisioned with the initial profile.

### Powerful device control

You can use KACE Cloud MDM to send specific commands to any mobile device that has been registered. You can inventory, lock, unlock, erase or factory reset the device; reset its password; or determine its location.

### Flexible, comprehensive device inventory

KACE Cloud MDM can automatically inventory your devices daily, and you can manually trigger the inventory as needed. The information collected includes device attributes, configured policies, installed appliances, installed certificates, installed profiles and network settings (Wi-Fi and VPN).

### User management

Users often have multiple devices, so KACE Cloud MDM enables IT administrators to both filter the user list by device attributes, and filter the device list by user attributes.

### Platform consistency

Make device management easy by minimizing platform differences. KACE MDM uses a common set of inventory attributes, policies and management commands for all managed devices.

### KACE SMA integration

You can integrate KACE Cloud MDM with the KACE Systems Management Appliance at no additional cost. Devices will appear in the KACE SMA device listing and their details can be viewed like any other machine.

## ABOUT QUEST

Quest helps our customers reduce tedious administration tasks so they can focus on the innovation necessary for their businesses to grow. Quest® solutions are scalable, affordable and simple-to-use, and they deliver unmatched efficiency and productivity. Combined with Quest's invitation to the global community to be a part of its innovation, as well as our firm commitment to ensuring customer satisfaction, Quest will continue to accelerate the delivery of the most comprehensive solutions for Azure cloud management, SaaS, security, workforce mobility and data-driven insight.
